

# VUE TENNIS TESTIMONIAL

Team,

Attached are the updated photometrics for the Cree, Visionaire, LSI and NLS Lighting fixtures. It is my professional opinion that the NLS Lighting optics are far superior than the Competitors ran. In every instance the lighting levels at the center of the court were far less than the VUE fixture from NLS Lighting. In order to get the light anywhere near the levels of the VUE, the competitors all had to be tilted in some cases up to 30° to achieve the same results as the VUE with no tilt.

The other area NLS far outshines the other fixtures is the uniformity of the light. Because of the superior optics of the VUE, the Max:Min ratios far exceeded the other manufacturers. Please do not hesitate to call should you have any questions or concerns.

*Thanks,*
